S&B Utilities wins a contract with Northumbrian Water Group

We are delighted to share that S&B Utilities has been appointed as one of 33 new partners to help deliver Northumbrian Water's £3.6bn AMP8 capital investment programme.

The scope of work will include the design, construction, and commissioning of new water and wastewater infrastructure assets, asset renewals, asset modifications, and refurbishments.

Commencing ahead of AMP8, this contract aims to create a robust resource to support a significant investment programme and a significant business opportunity for S&B Utilities.

Managing Director Sean Hager said, "We are thrilled to have been successful in winning a place on this framework and very much look forward to working with NWG's in-house Integrated Delivery Services (IDS) team to deliver lean and agile short-term schemes, as well as supporting the wider ecosystem across the Living Water Enterprise."

Hargreaves Industrial Services launches LinkedIn Life page

Our LinkedIn Life page offers an exclusive glimpse into life at Hargreaves Industrial Services. This page is a premium version of LinkedIn that unlocks a lot more functionalities than available on our regular page. The chief purpose of this page is to attract talent and engage existing employees of a company.

Major Milestone for the STA Dosing Project

We have recently reached a major milestone for the STA Dosing Project; the volume of treated material processed by the plant passed the 500,000 tonnes mark. Via a PID loop, the system doses the arisings from the Northolt Tunnels such that they can be reused in the construction process for the Copthall Green Tunnel and the Southern Special Placement Area.

Hargreaves Industrial Services Head of Engineering & Projects Peter Brooks said, "Half a million tonnes in such a short period is a significant achievement and testament to the many people and organisations that contributed to the design and construction of the scheme."
