HIS NEWS

DECEMBER EDITION

Hargreaves | S&B Utilities

Hargreaves Industrial Services

Welcome to Decembers newsletter! As we approach the end of the year, we take this opportunity to share our accomplishments and exciting updates with you from across the division. We are grateful for your continued support, and we look forward to achieving even greater success together in 2024.

New Site Services Contract to Commence in December

We are pleased to announce that our new site operations contract with Enfinium will commence at the start of December. HIS will support the day-to-day operations of the brand-new energy from waste facility, based in West Yorkshire. This includes crane operation, tipping hall duties, and ash handling. We are confident that this partnership will enhance operational efficiency and contribute to a sustainable future.

The facility will process up to 410,000 tonnes of residual waste and use it to generate 49MW (gross) of renewable baseload electricity per annum. This is enough energy to power more than 100,000 UK homes.

Reward & Recognition: Darren Tong Honored for Exemplary Safety Actions

Darren Tong, Industrial Cleaner at Staythorpe Power Station, received a reward and recognition from HIS for proactive safety actions. Darren has been recognised by RWE, the station owners and operators.

Staythorpe is a gas-fired combined-cycle gas turbine power plant that began commercial operation towards the end of 2010. It has a gross capacity up to 1,850MW – enough to cover the energy needs of around 2.8 million homes.

Darren reported a leak on a pump, informed the control room, and made sure no one entered the area until operation staff arrived. Darren's actions serve as an exemplary model for his colleagues, reinforcing the culture of safety that is vital in the workplace.

Photo shows Darren is receiving his coin and voucher of John Moorhouse, RWE Contract Manager.

Health & Safety ISOQAR Audit Pass

Alcumus
ISOQAR

We are thrilled to share we have passed our pre-certification ISOQAR audit with flying colours, with no non-conformance reports, no opportunity for improvement, and just 2 minor observations across the whole division. The ISOQAR external audits are carried out by Alcumus, and they verify our compliance with our systems.

SHEQ Manager Dave Turner said, “This is an extremely positive result from all sites visited. It is a testament to how well our operational teams follow our systems out on site that our audits go smoothly and we as an organisation can get excellent results like this.”

Killingholme accepts delivery of new Volvo fleet

This week, our team at Killingholme updated their fleet with 3 new Volvo FM 460 tippers, with 6 more to follow in December.

We also have engaged with [Volvo Trucks](#) to undertake some training with our driver fleet at Killingholme. Our drivers learnt how to improve their driving style to increase fuel efficiency, reduce idle time and overall improve carbon emissions. As we continue to invest in both our equipment and our team, we look forward to a greener and more efficient future in our operations.
